Keren-Happuch Akpagher

Dear Attorney General,

The **14-year-old Keren-Happuch Akpagher** was a student in the Nigerian capital Abuja and looking forward to the next summer holidays with her mother. On 22 June 2021 she died after being raped in school. The cause of death was sepsis triggered by a condom left in her vagina.

I call upon you to set up an immediate, impartial and transparent investigation into her rape and subsequent death. Those found to be responsible should be given a fair trial, according to international standards, without the threat or use of the death penalty.

Yours sincerely,
